TOURING SULLIVAN COUNTY'S MUSEUM . . . while dusting

Recently three photos were brought into the museum while the Tubach Building's contents were being cleaned out. None have any identification what so ever. The group of young people lounging is quite water damaged. One photo is a tin type with four men, two seated and two standing behind them, all wearing what looks to be bowler hats. But it is so bent that we feared putting into our scanner would scratch the glass surface. It is such a shame when people run across photographs with no identity and that is why it is so important to mark photos with who, where and when. If a photo means enough for you to keep it, then pass that information on for those in the future to appreciate the value of the photo that you've held onto. Anyone who may have knowledge of these photos or may wish to view them in person, please contact the museum. Phone is 570-946-5020 and email is museum@scpahistory.com or come in on a Thursday, Friday or Saturday from 1 to 5 o'clock, please.

Speaking of photos; a correction to the team picture with our article of June 1st concerning the Sonestown Town Team. The description given then was taken not only from a 1994 newspaper print but also from the back of the original photo. But from Karen Bobb, Willard Eberlin's youngest daughter, she states that Willard was misidentified and it was actually Elmer (Jupe) Eberlin.
